### **Addition**

# **Early Years Foundation Stage**

Key Vocabulary: add, more, and, make, sum, total, altogether, is the same as, one more, two more, how many more to make...?

# Learning Intentions

Develop fast recognition of up to 3 objects, without having to count them individually ('subitising'). Recite numbers past 5. Say one number for each item in order: 1,2,3,4,5. Know that the last number reached when counting a small set of objects tells you how many there are in total ('cardinal principle').

Show 'finger numbers' up to 5. Solve real world mathematical problems with numbers up to 5. Compare quantities using language: 'more than' Understand the 'one more than relationship between consecutive numbers Explore the composition of numbers to 10 Automatically recall number bonds for numbers 0-5 and some to 10. including double facts.

#### Concrete

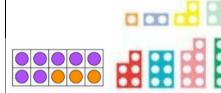

Pictorial

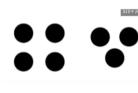

**Abstract** 

Children are encouraged to develop a mental picture of the number system in their heads to use for calculation. Children count forward from different starting points.

Children are given opportunities to use counting on during play situations (e.g. How many teddies have come to the picnic?) Children learn songs and rhymes involving counting.

Children will be encouraged to mark make to represent their thinking.

A range of resources e.g. dominoes and dice are used to build up a visual representation of numbers.

Recognise numbers 0 to 10

012345678910

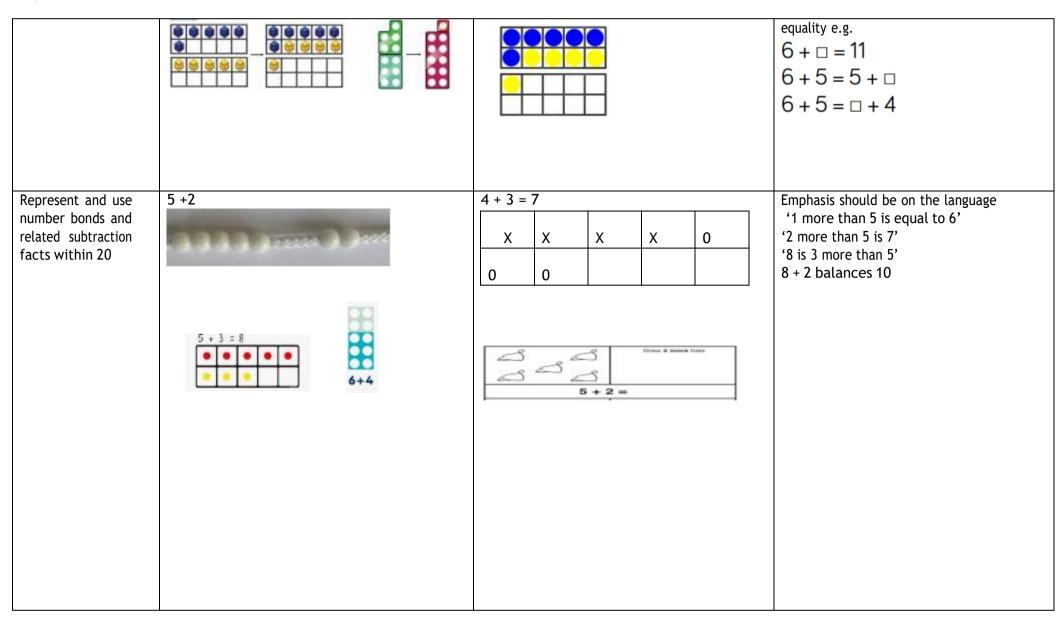

Count reliably up to 10 everyday objects

# Year One

Key Vocabulary: add, more, plus, make, sum, total, altogether, is the same as, equals, balances, sign, one more, two more, ten more, how many more is...? How many more is...?

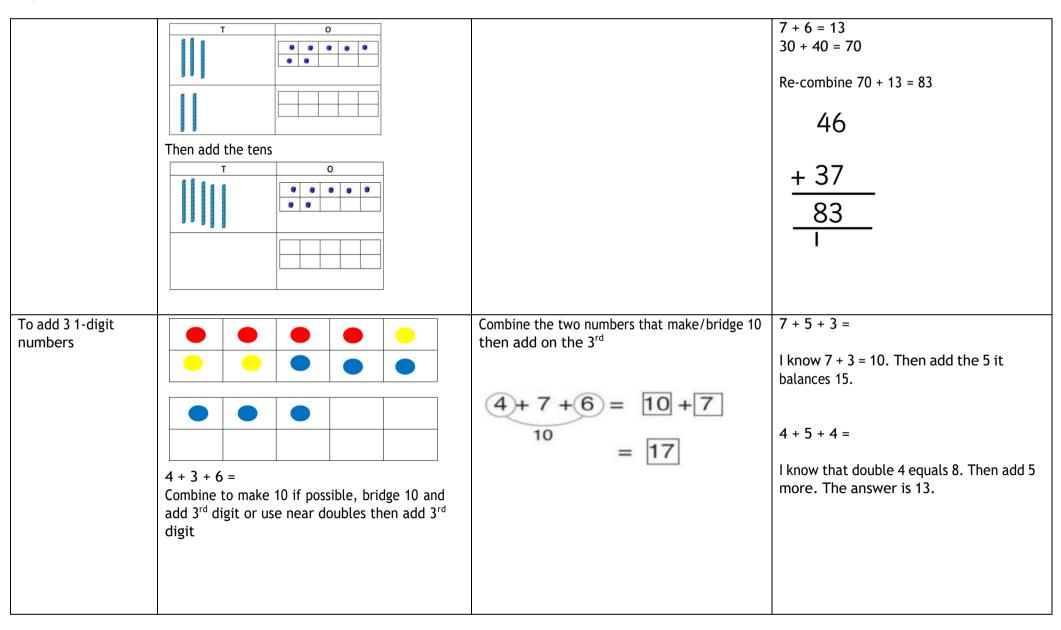

Learning Intentions	Concrete	Pictorial	Abstract
Combining two parts to make a whole: part part whole (PPW) model	Combining two parts to make a whole (use other resources too e.g. eggs, shells, teddy bears, cars).	Children to represent the cubes using dots or crosses. They could put each part on a part whole model too.	4 + 3 = 7 4 is a part, 3 is a part and the whole is seven.
Counting on from the biggest number	Using number lines, cubes or Numicon	A bar model which encourages the children to count on, rather than count all.	The abstract number line: What is 2 more than 4? What is the sum of 2 and 4? What is the total of 4 and 2 or 4 + 2?
Regrouping to make 10	Using ten frames and counters/cubes or using Numicon. 6 + 5	Children to draw the ten frame and counters/cubes.	7 + 4= 11  If I am at seven, how many more do I need to make 10. How many more do I add on now?  Children to develop an understanding of

# Year Two

more is? How many			
Learning	Concrete	Pictorial	Abstract
Intentions			
Adding multiples of		$x \times x \times + \times x = 6$	I know that 3 + 4 = 7
10		1111 11	30 + 40 = 70
Using known facts		<b>                                     </b>	20 + 30 = 50
		4 tens + 2 tens =tens	70 = 50 + 20
	11111	40 + 20 =	40 + □ = 60
To add 2-digit to 1-digit 2-digit to ten 2-digit to 2-digit (bridging and not bridging)	Make the biggest number on the place value mat. Then make the next number.  Then add the ones	Children to represent the base 10 e.g. lines for tens and dot/crosses for ones.	Children add by partitioning $ 41+8 $ $ 1+8=9 $ $ 40+9=49 $ $ +41 $ $ 49 $ $ 49 $ $ 49 $ $ 40+9=49$ $ 40+9=49$ $ 40+9=49$ $ 40+9=49$ $ 40+9=49$ $ 40+9=49$

# **Subtraction**

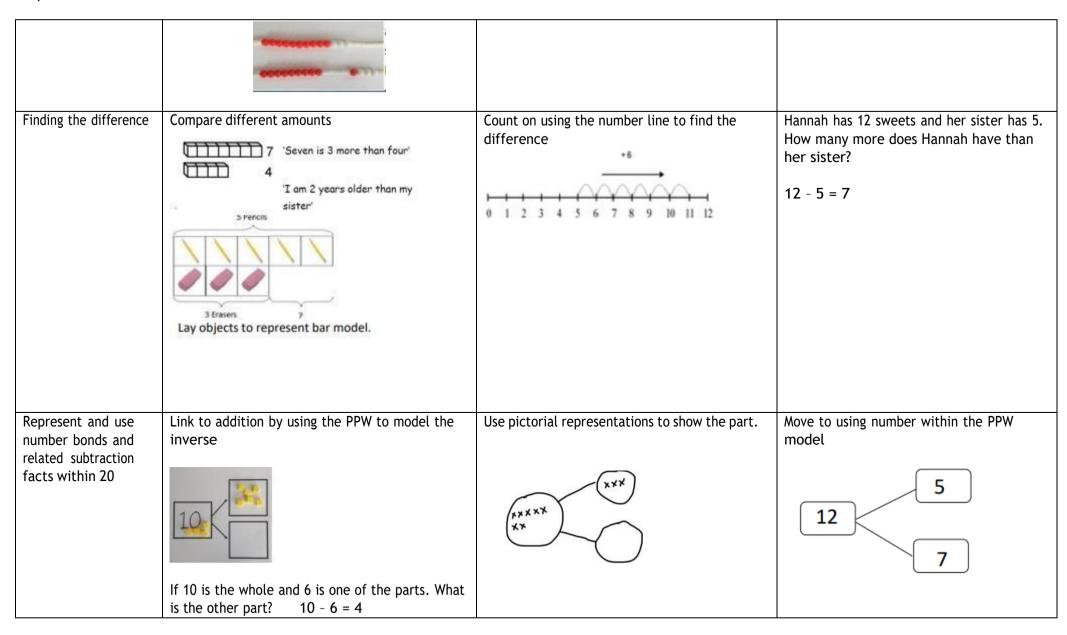

# **Early Years Foundation Stage**

#### Key Vocabulary: take (away), leave, subtract, how many are left/left over? One less, two less, fewer, difference between, how many have gone? **Pictorial Abstract** Learning Concrete Intentions Experiment with their Children are encouraged to develop a mental picture of the number system in their heads to use for calculation. own symbols and marks as well as Children are given opportunities to practise counting backwards in a variety of contexts e.g. by jumping on an outdoor number line. numerals. Solve real learning songs and rhymes. world mathematical problems with numbers up to 5. Children are introduced to the concept of difference through play. E.g. Who has the fewest? How many fewer do you have? Compare quantities using language: 'fewer than'. Compare numbers. Understand the 'one less than' relationship between consecutive numbers Automatically recall (without reference to rhymes, counting or other aids) number bonds up to 5 (including subtraction facts)

# Year One

Key Vocabulary: subtract, take (away), minus, leave, how many are left/left over? How many are gone? One less, two less, ten less, how many fewer is...than...? How much less is..? difference between, is the same as, equals, balance, sign

	stnan! How much less is! difference between, is the same as, equals, balance, sign						
Learning	Concrete	Pictorial	Abstract				
Intentions							
Taking away ones	Physically taking away and removing objects from a whole (ten frames, Numicon, cubes and other	Cross out drawn objects to show what has been taken away.	7—4 = 3				
*Must ensure that children are ready to use the - sign	items such as beanbags could be used). $6-4=2$ $4-2=2$	$ \begin{array}{cccc} \stackrel{\wedge}{\wedge} & \stackrel{\wedge}{\wedge} & \stackrel{\wedge}{\wedge} & \stackrel{\wedge}{\wedge} \\ \stackrel{\wedge}{\wedge} & \stackrel{\wedge}{\wedge} & \stackrel{\wedge}{\wedge} & \stackrel{\wedge}{\wedge} & \stackrel{\wedge}{\wedge} \\ \stackrel{\wedge}{\wedge} & \stackrel{\wedge}{\wedge} & \stackrel{\wedge}{\wedge} & \stackrel{\wedge}{\wedge} & \stackrel{\wedge}{\wedge} \\ 15 - 3 = \boxed{12} \end{array} $	16—9 = 7				
Counting back	Moves objects away from group counting back	Count back in ones using the number line	Put 13 in your head, count back 4. What number are you at?				
	Move the beads back along the beadstring as you count backwards	5 - 3 = 2					

Make 10

Make 14 on the ten frame. Take 4 away to make ten. Then take one more away so that you have taken 5.

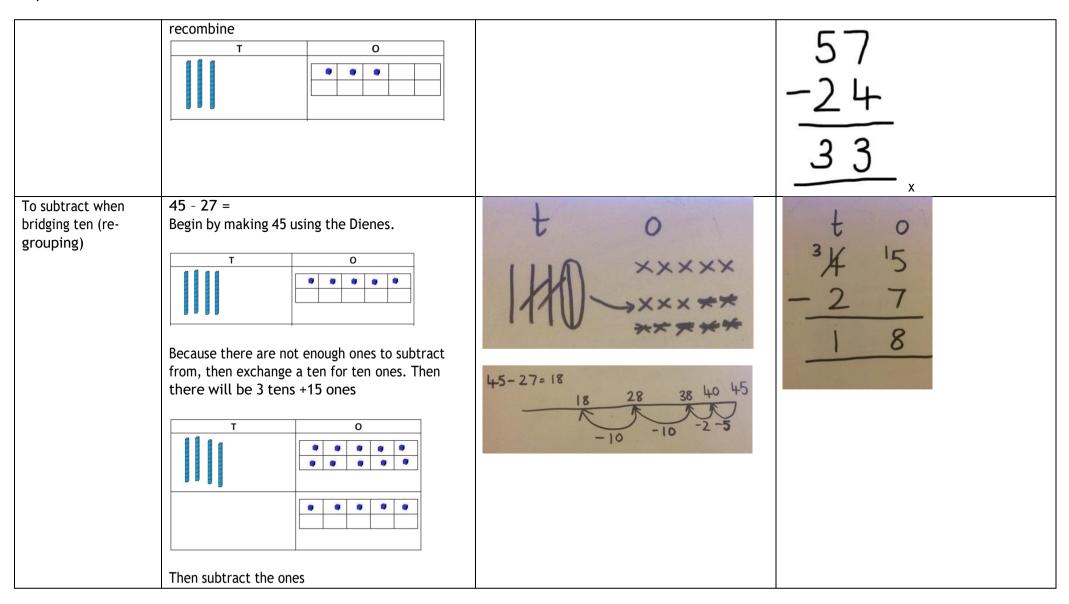

Draw the 10 frame and use crosses for ones. Then cross out 4.

Then cross out 3. Then cross out 4.

### Year Two

Key Vocabulary: subtract, take (away), minus, leave, how many are left/left over? How many are gone? One less, two less, ten less, how many fewer is...than...? How much less is...? difference between, is the same as, equals, balance, sign

Learning Intentions	Concrete	Pictorial	Abstract
To subtract without bridging ten (no regroupng)	Children to use the Dienes to make the biggest number. Then physically remove. Always taking away the ones first. Then minus the tens. Then		57 - 24 = 33 7 - 4 = 3 50 - 20 = 30 30 + 3 = 33

T	0		

# Multiplication

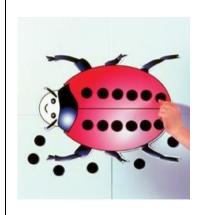

# **Early Years Foundation Stage**

Key Vocabulary: odd, even, groups of, lots of, double, pattern

3, 4				
Learning	Concrete	Pictorial	Abstract	
Intentions				

Explore and represent patterns within numbers up to 10, including evens and odds, double facts and how quantities can be distributed equally

Children will experience equal groups of objects and will count in groups. They will work on **practical problem solving activities** involving equal sets or groups.

How many socks do 4 children wear?

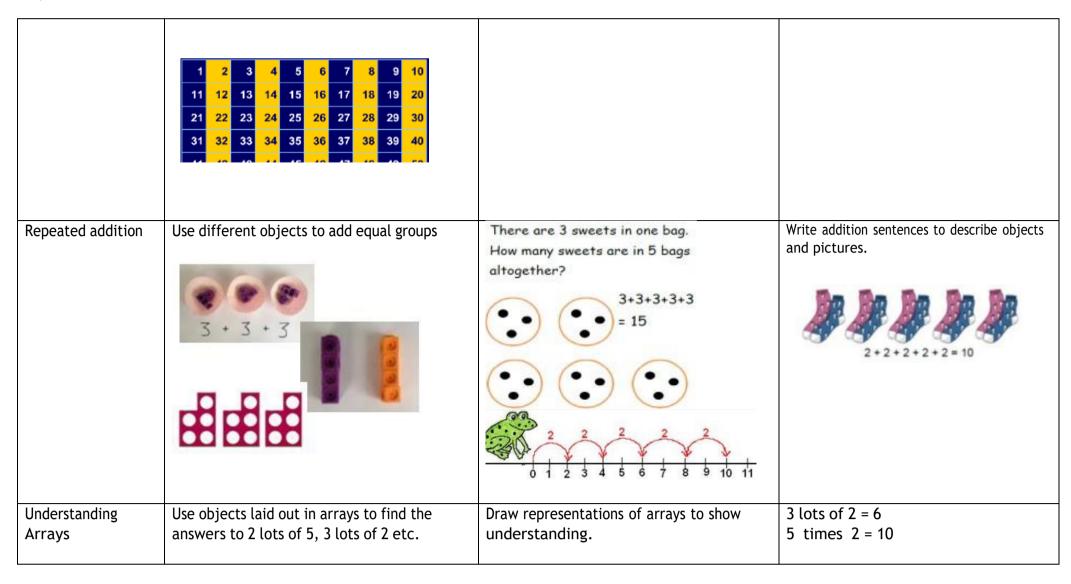

I give you each 4 strawberries how many Are there altogether?

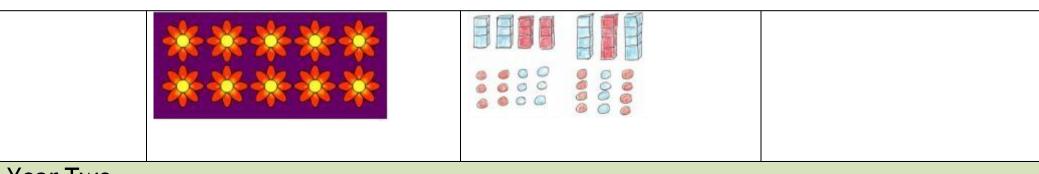

1,2,3,4,5,6,7,8

Learning Intentions	Concrete	Pictorial	Abstract
Doubling (up to double 10)	Use practical activities using manipulatives including cubes and Numicon to demonstrate doubling	Draw images to double numbers    X	4 + 4 = 8 5 + 5 = 10 12 = 6 + 6 3 + ? = 6
Counting in multiples	Count the groups as children are skip counting, children may use their fingers as they are skip counting.	Children make representations to show counting in multiples.	Count in multiples of a number aloud. Write sequences with multiples of numbers.  2, 4, 6, 8, 10  5, 10, 15, 20, 25, 30

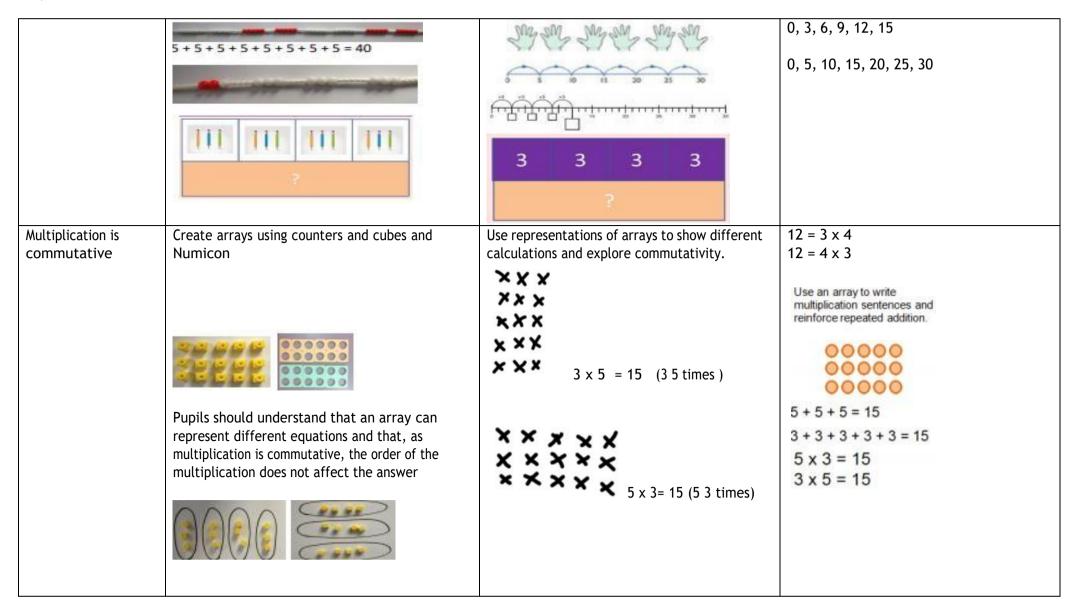

# Year Two

Key Vocabulary: odd, even, double, near double, multiple, pattern, times, multiplied, groups of, lots of

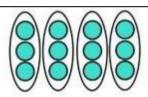

Learning Intentions	Concrete	Pictorial	Abstract
Doubling	Doubling using place value using Dienes  40 + 12 = 52	Double 24 = 48  t o	Partition a number and then double each part before recombining it back together.  16  20 12 20 + 12 = 32
Counting in multiples Of 2s, 3s, 5s, 10s (forwards and backwards)	Count the groups as children are skip counting, children may use their fingers as they are skip counting. Use bar models.	Number lines, counting sticks and bar models should be used to show representation of counting in multiples.	Count in multiples of a number aloud. Write sequences with multiples of numbers.  0, 2, 4, 6, 8, 10

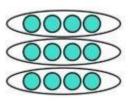

Using the Inverse

This should be taught alongside division, so pupils learn how they work alongside each other.

 $3 \times 4 = 12$   $4 \times 3 = 12$   $12 \div 4 = 3$  $12 \div 3 = 4$  20 4 5

**Early Years Foundation Stage** 

Concrete

Key Vocabulary: half, smallest, less, equal groups, share, equally

The focus at this stage will be practical,

with the teacher demonstrating, and using the correct vocabulary.

Children solve grouping problems

# **Division Pictorial Abstract** In division children will be introduced as both sharing and grouping using a variety of resources. Children will understand equal groups and share items out in play and problem solving. If I have 6 buttons and I share them between 2 people, how many will each person get?

'Get yourselves into groups of '.

Learning

represent patterns within numbers up

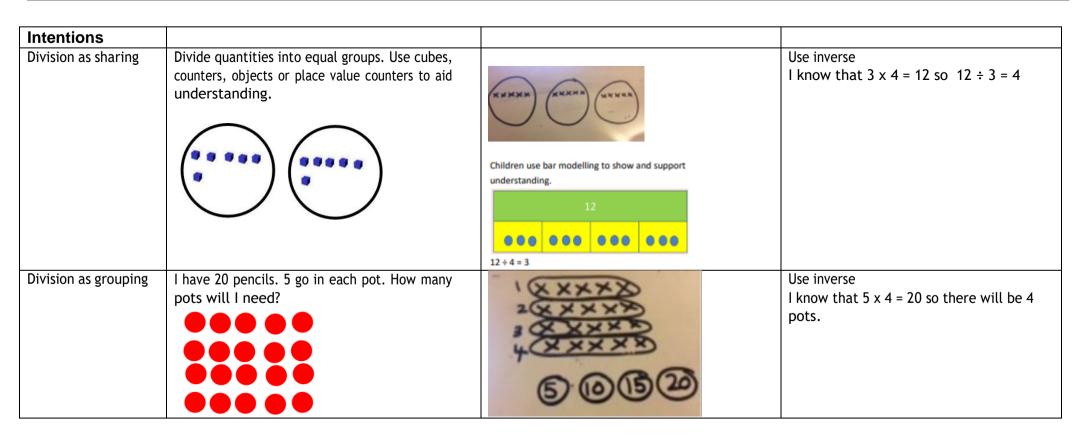

how quantities can be distributed

to 10, including

Year One Key Vocabulary: half, halves, smallest, less, equal groups, share, equally, divide, division, group, half					
Learning Intentions	Concrete	Pictorial	Abstract		
Halving	Children use practical apparatus to share equally	Use a picture to share in two sets equally	Half of 4 = 8 ½ of 4 = 8		
		$\left(\times \times \times\right) \left(\times \times \times\right)$ Half of 6 = 3	I know that double 4 balances 8 so half of 8 is 4.		
Division as sharing	I have 10 cubes, can you share them equally in 2 groups?	Sharing:  4  4  12 shared between 3 is 4	12 shared between 4 groups is 3  If I share 6 sweets equally between 2 friends, they will have 3 each.		

Year Two					
Key Vocabulary: half, halves, smallest, less, equal groups, share, equally, divide, division, group, half
